

EDUCATION

•Vidyavardhini's College of Engineering and Technology	July 2022 – May 2026
BE - Information Technology	CGPA: 7.00
•Shivshambho Arts and Science College, Kanher	June 2021 – Feb 2022
HSC - Maharashtra State Board	Percentage: 76.50%
•Shriram English School, Paniv	June 2019 – Mar 2020
SSC - Maharashtra State Board	Percentage: 81.00%

EXPERIENCE

•Godrej Infotech	August 2025 – October 2025
Data Analytics with Cloud Computing & AI Intern	Remote
– Completed industry-oriented training in Data Analytics, Cloud Computing, and AI; applied data visualization, analytical techniques, and modern IT tools to solve real-world data handling problems.	
– Worked with structured datasets using SQL-based querying and cloud-hosted data storage solutions; gained exposure to database-driven pipelines for analytical reporting.	
•Vidyavardhini's College of Engineering and Technology (VCET)	June 2025 – June 2025
Data Science & Deep Learning Intern – Dept. of AI&DS & IIIC, in association with Rogue Code	On-site
– Underwent intensive training in Data Science covering feature engineering, data preprocessing, and exploratory data analysis; applied industry-standard techniques to structured real-world datasets.	
– Implemented deep learning models and completed a capstone activity, gaining practical exposure to neural network architectures and end-to-end model development workflows.	
•Next24Tech	June 2024 – August 2024
Python Developer Intern	Remote
– Developed and deployed 5+ Python-based digital solutions following full SDLC using Agile methodology; utilized Git and GitHub for version control, reducing code conflicts by 40% through structured commit workflows.	
– Designed 20+ automated test cases; managed and queried relational databases (MySQL) to support back-end data operations, achieving a 95% bug-free delivery rate across all sprint deliverables.	

PERSONAL PROJECTS

•Cotton Leaf Disease Detection & Crop Suitability Platform	Aug 2025 – may 2026
AI-powered full-stack web application for cotton disease diagnosis and crop suitability analysis	Live Demo
– Tools: Python, Flask, Next.js, TensorFlow, CNN, Vision Transformer (ViT), PostgreSQL, Docker, JWT, Vercel, Render	
– Developed an AI-powered platform for cotton leaf disease detection using ensemble CNN and Vision Transformer models, achieving 89% classification accuracy on 3,000+ labeled images.	
– Implemented crop suitability analysis using environmental factors including temperature, humidity, rainfall, soil type, and soil moisture to provide cultivation recommendations.	
– Built a full-stack application with user authentication, prediction history, batch image processing, REST APIs, and cloud deployment using Vercel and Render.	
•Automated Business Data Extraction System	Jan 2026
Web scraping and browser automation solution for extracting business registration records from government portals	GitHub
– Tools: Python, Selenium, BeautifulSoup,undetected-chromedriver, XPath, CSS Selectors, JSON, Regex	
– Developed an automated web scraping solution to extract company registration data, filing history, registered agent details, and name change records from government business portals.	
– Implemented anti-bot detection bypass techniques including browser fingerprint masking, randomized delays, and human-like interactions; stored data in structured JSON and HTML formats.	
•News Recommendation System	Jan 2025
Full-stack ML-powered platform using hybrid Content-Based and Collaborative Filtering	
– Tools: Python, Pandas, Scikit-learn, NLP, TF-IDF, K-Means Clustering, SVD, MySQL	
– Built hybrid recommendation engine processing 10,000+ articles; designed and managed a normalized MySQL database schema for user profiles and article metadata, improving query retrieval performance by 30%.	

TECHNICAL SKILLS

Databases & SQL: MySQL, MongoDB, PostgreSQL, Oracle SQL (Basics), RDBMS Concepts, Schema Design, CRUD Operations, Data Integrity, Normalization, Indexing, Cloud-Ready Data Storage
Languages: Python, SQL, JavaScript, HTML, CSS
Frameworks & Libraries: Flask, Next.js, Pandas, Scikit-learn, TensorFlow, YOLOv8, Vision Transformer (ViT)
DevOps & Tools: Git, GitHub, Docker, AWS, Vercel, Render, Chrome DevTools, Debugging & Testing
Technologies: Machine Learning, Deep Learning, NLP, Computer Vision, Data Analysis, Web Scraping, Cloud Computing
Methodology: Agile, SDLC, REST APIs, OOP, Modular Code Design
Soft Skills: Problem Solving, Team Collaboration, Analytical Thinking, Communication
